Our mission at Quanta is to improve the lives of patients by using innovative design and cutting edge technology to provide affordable solutions in renal care.

SC+ is designed with you in mind. Whether you’re a patient, provider or practitioner, SC+ provides solutions through innovative design.

**Design**
SC+ is designed with you in mind. Whether you’re a patient, provider or practitioner, SC+ provides solutions through innovative design.

- **SC+ is easy to use, saving you time**
  Intuitive touchscreen interface and cartridge-based design for quick, confident set-up and operation.

- **SC+ is designed for the real world**
  Contemporary and sleek design, perfect for any care setting.

**Performance**
SC+ provides next generation solutions in renal care without compromising on performance.

- **Small in size, big on performance**
  Faster turnaround times with efficient set up and simple cleaning requirements.

- **The innovative technology of SC+ makes high-performance simple**
  Unique single-use cartridge system designed to simplify dialysis without compromising on flow rates.

**Choice**
SC+ is designed to provide flexibility across a range of care settings and treatment programmes. SC+ delivers consistent performance throughout the continuum of care.

- **More treatment choices with SC+**
  SC+ is small and compact, offering flexibility when you need it.

- **Consistent performance with every choice**
  Patients can seamlessly transition through different care settings with SC+ and still receive the optimum treatment at every stage.

**Cost-effectiveness**
In order to truly improve the lives of patients, innovation must be affordable and accessible. As well as clinical benefits, SC+ also delivers a range of economic benefits through forward thinking design and technology.

- **SC+ lightens the load of renal care**
  Easy set-up and operation reduces treatment complexity.

- **SC+ offers independence**
  The simplicity of SC+ will enable more patients to transition to self-care or home dialysis, both of which carry reduced direct and long-term costs.
